

About BitMEX

BitMEX is a crypto-coin P2P trading platform and the first and only to be built on 64bit KDB+. This allows high frequency trading while providing maximum security and auditing on the platform – Full risk-checks are performed after each and every order placement, trade, settlement, deposit and withdrawal. In addition, BitMEX was the first crypto-coin P2P trading platform to adopt an offline multi-signature wallet for enhanced security.

BitMEX by the Numbers

BitMEX processes an average of **1,230,000** daily orders for the past 30 days.
