

Benefits of KX Insights™ on Amazon Web Services

KX has 20+ years of experience and invested in a community of KX experts to deliver the most comprehensive streaming analytics solution today on Amazon Web Services.

Runs natively within AWS
with support for OpenShift
deployments

Serverless Deployment
Autoscaling with high
availability

Fastest time-series
engine in the market

AWS S3 can save you 10-15X
on your storage costs

WHY KX INSIGHTS?

KX delivers a cloud-native platform for real-time streaming analytics that fully leverages the benefits of cloud architecture to deliver fast scalable real-time data insights without the complexity of infrastructure. This enables organizations to rapidly scale up their real-time decision-making capabilities and foster a culture of actionable business intelligence.

- **End-to-End Visibility** – One platform leveraging its microservices-based architecture for capturing, storing and processing high-volume, high-velocity data using cloud standards, services, and protocols.
- **Continuous Intelligence** – KX delivers real-time analysis of any data, whether at speed or at rest, providing firms with dynamic timely insights. SQL based tools for advanced analytics and querying of data enables continuous insights, anomaly detection and automated responses.
- **Cloud Native** - Supports cloud infrastructure delivering direct access to low-cost object storage for large data sets, trusted cloud security, REST API for easy integrations and much more!

WHY KX & AMAZON WEB SERVICES?

- **Simplified Onboarding** - AWS marketplace offers instant onboarding for all users while also permitting custom deployments via enterprise purchases and existing licenses.
- **Scalable** - Leverage AWS tools, Auto Scaling and Elastic Load Balancing, to scale applications up or down based on demand. Based on demand, providing wide access to compute and storage resources when needed.
- **Reliable** - AWS offers scalable, reliable, and secure global computing infrastructure, the virtual backbone of Amazon.com’s multi-billion dollar online business.

KEY BENEFITS OF A CLOUD FIRST SOLUTION

General

Availability in AWS Marketplace

Native low-cost object store w/ Amazon S3

24/7 deployment monitoring & reporting w/ Amazon CloudWatch

Multi-cloud & hybrid cloud deployment

Autoscaling with high availability

Data persistence & durability

Built-in REST client

Interoperability across systems

Native SQL Support (Q2 2021)

Kubernetes Support
