

KX INSIGHTS™

DATA SHEET

Benefits of KX Insights™ on Microsoft Azure

KX has 20+ years of experience and invested in a community of KX experts to deliver the most comprehensive streaming analytics solution today on Microsoft Azure.

Runs natively within Microsoft Azure with support for OpenShift deployments

Serverless Deployment
Autoscaling with high availability

Fastest time-series engine in the market

Azure Blob Storage can save you **10-15X** on your storage costs

WHY KX INSIGHTS?

KX delivers a cloud-native platform for real-time streaming analytics that fully leverages the benefits of cloud architecture to deliver fast scalable real-time data insights without the complexity of infrastructure. This enables organizations to rapidly scale up their real-time decision-making capabilities and foster a culture of actionable business intelligence.

- **End-to-End Visibility** – One platform leveraging its microservices-based architecture for capturing, storing and processing high-volume, high-velocity data using cloud standards, services, and protocols.
- **Continuous Intelligence** – KX delivers real-time analysis of any data, whether at speed or at rest, providing firms with dynamic timely insights. SQL based tools for advanced analytics and querying of data enables continuous insights, anomaly detection and automated responses.
- **Cloud Native** - Supports cloud infrastructure delivering direct access to low-cost object storage for large data sets, trusted cloud security, REST API for easy integrations and much more!

KX INSIGHTS™ ON MICROSOFT AZURE

WHY KX & AZURE?

- **Simplified Onboarding** - Azure marketplace offers instant onboarding for all users while also permitting custom deployments via enterprise purchases and existing licenses.
- **On-demand Scalability** - Organizations can increase their storage space and computing power on demand. Users can adjust their service agreements to prevent disruption of their high-load applications.
- **World-class security** - Azure's built-in security tools help maintain the privacy, integrity and availability of sensitive information through its multi-layered security model.

KEY BENEFITS OF A CLOUD FIRST SOLUTION

General

Availability in in Azure Marketplace

Native low-cost object store w/ Azure Blob Storage

24/7 deployment monitoring & reporting w/ Azure Monitor

Multi-cloud & hybrid cloud deployment

Autoscaling with high availability

Data persistence & durability

Built-in REST client

Interoperability across systems

Native SQL Support (Q2 2021)

Kubernetes Support
