

INSIGHTS™

ROI CALCULATOR

KX Insights™ Object Store

KX Insights™ integration with the Cloud Object storage solutions can help significantly lower storage costs. With object storage **5 to 15X** cheaper than block storage it is the perfect solution for large volumes of historical data.

By providing direct integration to cloud object storage applications, KX Insights™ enables users to tier their data storage balancing the cost and performance requirements of their use case, with no need to install and manage a 3rd party software solution.

Example:
Global Investment Bank
+70k employees
\$40B market cap

See below for a sample calculation of a KX client and the savings they attained.

Capacity

Enter your Tier 1 Block Storage Capacity (in TBs/Yr)

10TB ————— 10,000 TB

TB

Performance

Percentage of data latency sensitive

0% ————— 100%

%

Current Cost

Cost per TB/yr for Tier 1 Block Storage

\$10 ————— \$10K

\$ TB/yr

ROI CALCULATOR

\$1,875,000 in savings
(75%) OVER FIVE YEARS

Highlights

Reduce Storage Costs

Access to cost effective storage for infrequently accessed long-tail data

Reduce Downtime

Object store provides highly redundant durable storage

Create New Business Value

Improve performance and scalability with object-based storage environments to improve query response times

Cloud Support

KX offers support across multi-cloud, Rest API and services for authentication, logging, monitoring services and packaging
